SUPPLEMENT TO

- On 26 April 1951, Major Clezov (fnu), attached to the CCC Transport Division, requested that maps of Autobahnen, national high-"ays, and category I roads with data on all their bridges and their load capacities be made. At the same time, a tabulation listing all the bridges on the highways mentioned above and their load capacities was to be drawn up. These bridge tabulations were to be arranged in the following categories: bridge number; highway or waterway crossed; location; type of bridge; year built; length; load capacity.
- The following uniform measurements were established for the width of new bridges built in the German Democratic Republic: national highways: 7,20 meters; category I roads: 6 meters.
- The bridges are quarded by the Volkspolizei, who receive their orders from Department 3 of the Main Administration of the German Volkspolizei on Seckendorfstrasse, Perlin-Niederschoenhausen. tructures recuiring special security measures are bridges on Mational Michmays Ros 1, 2, 6, 7, 62, 85, 89, 90, 96, 101, 111, 169, 172, 188, and 250, ***
